B.E.

RV College of Engineering

08/2016 - 04/2020

8.01

Industrial Engineering and Managements

- Market Study for application of Blockchain Technology in Dairy Supply Chain to increase Traceability

PERSONAL PROJECTS

Birthday Reminder

- A simple birthday reminder application. It features to add, edit and delete options, and countdown. It stores data locally in the browser.
- Tool used - React, HTML, CSS

Color Generator

- A simple color generator application using React. It has a slider to increase or decrease the shade. The required color's hex value can be copied to the clipboard by clicking on the color.
- Tool used - React, HTML, CSS

Random Meme Generator

- A customized meme generator app, built-in ReactJS. It is a web app, which fetches random meme images from an API, adds the top text and a bottom text to it, and provides an option for downloading.
- Tools used - React, HTML, CSS

Todo List

- A simple To-Do list application using React. This application can add, edit and delete tasks. All tasks are saved into browser's local storage.
- Tool used - React, HTML, CSS

Ristorante Con Fusion

- A simple restaurant website that showcases the restaurant's best culinary creations, and promotions. It includes features such as signup/login and reservation. It has about page with restaurant info from the chef to map directions and a feedback form. It also encloses a menu, which provides a list of various food that the restaurant serves, along with description and price.
- Tools used - HTML, CSS, Bootstrap

bookCritics

- A replica of a book review website that offers every piece of information related to books such as publication, author, ISBN, ratings, and reviews. It contains a responsive subscription form. It includes a blog page to post articles and an about page with information on team members and contact.
- Tools used - HTML, CSS, JavaScript, Bootstrap, Flickity
